

The image features a snake plant with green and yellow variegated leaves growing out of a hollowed-out coconut shell. The coconut shell is light brown and has a rough, textured surface. The background is a dark grey surface with a pattern of concentric, hand-drawn circles in a lighter grey tone. On the right side, there is a vertical arrangement of 15 hexagons in various shades of grey, black, and white. The word "PORTFOLIO" is written in a bold, white, sans-serif font at the bottom center, underlined.

PATH (ISSUES)

The path surrounding the Theertham area is neither bitumen nor of concrete. It is seen in dilapidated condition, where one could find sand filled paths. Adding green spaces about this node would not only influence the microclimate but also add a visual charm.

TO
TEMPLE COMPLEX
(1.8 KM)

EDGES

The edges are defined by high risen compound walls and one could find few residential with thatch lining the street of the Lakshman Theertham.

ISSUES

There is absence of pavement along either sides of the road. Steps from buildings en-croach the road bringing inconvenience to travellers. Open drainage with sand clogging the drain is a regular display in most areas.

PATH

Lakshman Theertham is one of the major landmarks of Rameswaram. Its reach is destined along the AH43 - Dhatnushkodi road which comes into first hand destiny from Pamban. Visually the Theertham area is not a well maintained area.

TO
PAMBAN
(9.4 KM)

PROPOSAL

Development and maintenance of Lakshman Theertham node. Narrow streets should be widened. Pavements be added on either sides of road.

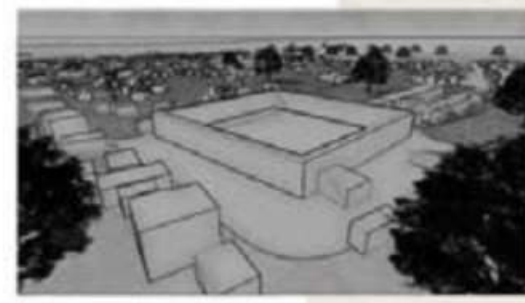

NODE

The node is defined by commercials on either sides of the complex along the Ah-43 road along with a few residential.

ISSUES

The zone is suffering of parking issues. Considerable spaces found along the sides and rear can be well used in order to avoid these parking issues.

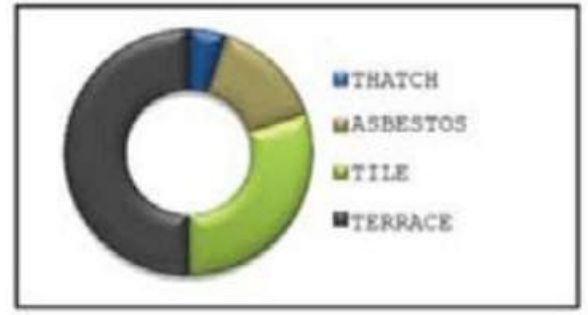

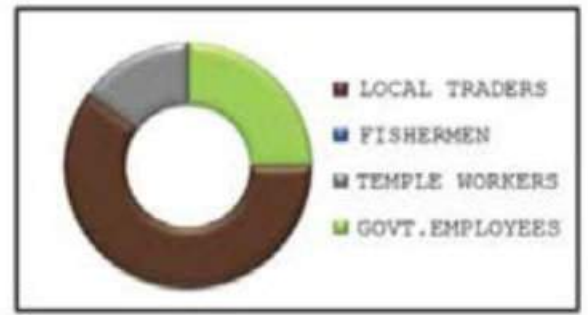

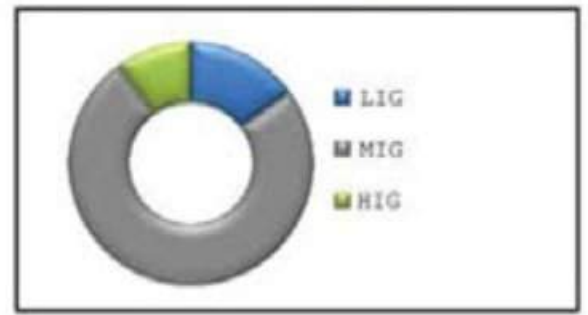

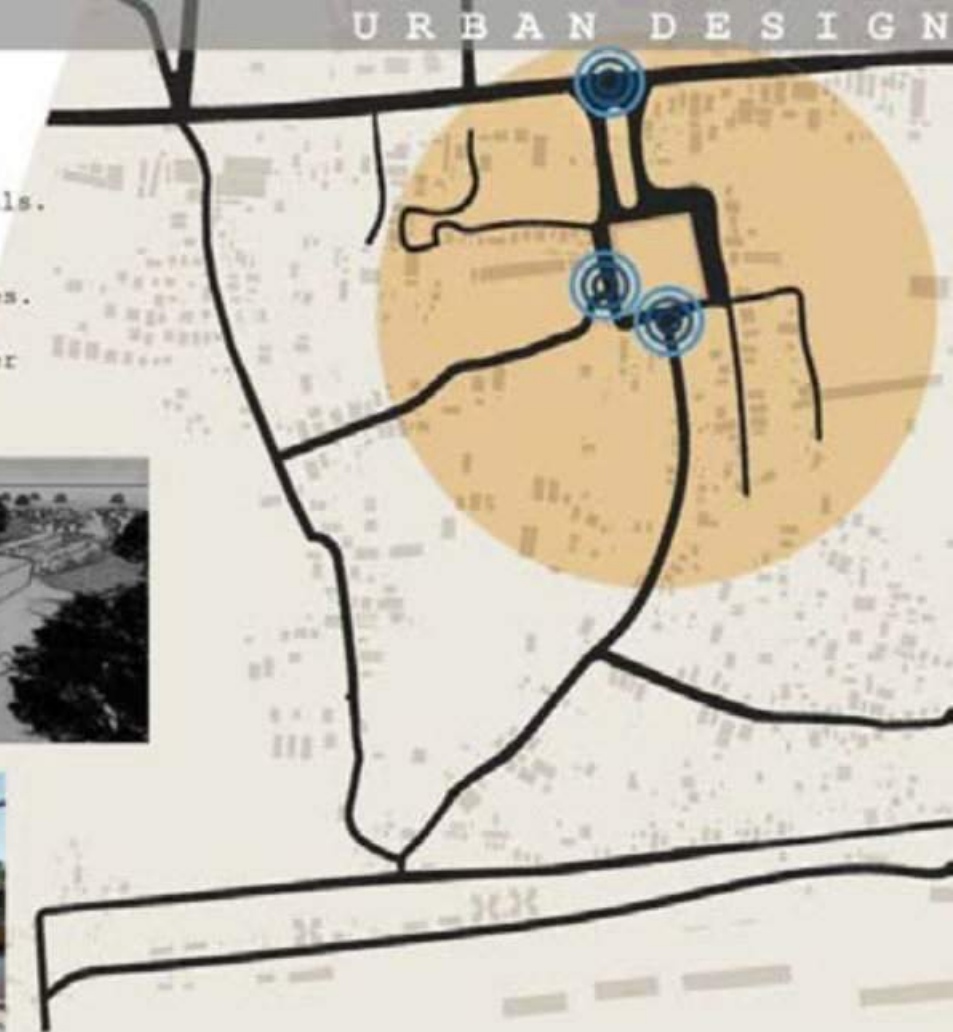

LANDMARKS

The major Landmark of this zone is the Lakshman Theertham. Shri Krishna Pranami Mandir; for rooms and exhibition of electric moving exhibition museum an architecturally exposed building at the junction of Lakshman Theertham and the AH - 43.

ISSUES

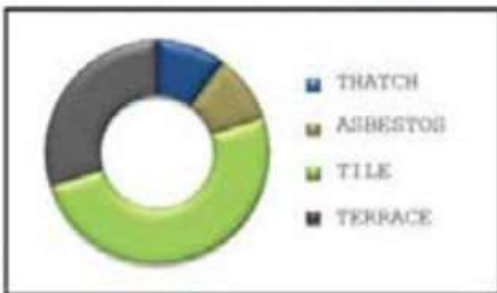

Although there is an area allocated for green space along its facade area, more consideration is needed in bringing up the standard by adding of more landscape elements to it

EAST CAR STREET

The East Car Street is a visual compose of commercials in major and a few residential aligning the Eastern Temple complex. The pure commercial lining road from the Agni Theertham ends into the view of East Gopuram at the middle of the street.

NORTH CAR STREET

Visually the North Car Street is edged with a mixed compose of residential and commercials on one side and the Temple complex on the other side with the North Gopuram jutting amidst them.

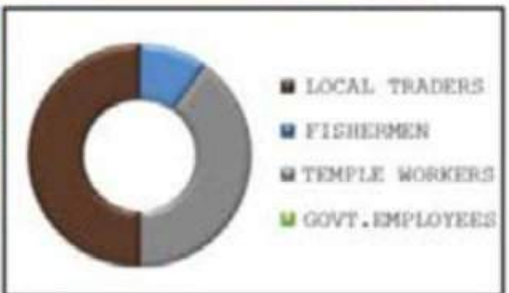

MIDDLE STREET

Pilgrims arriving to the Ramanathaswamy temple reach the middle street through the AH43 road. The Middle Street is a lineup of commercials until it reaches the Temple Complex.

AGNI THEERTHAM STREET

Visually the South Car Street is seen edging the South complex of the temple. The Street is purely aligned with commercials on either sides. The skyline of the street defined by the South Gopuram.

SOUTH CAR STREET

Visually the South Car Street is seen edging the South complex of the temple. The Street is purely aligned with commercials on either sides.

WEST CAR STREET

The street is seen with both residential and commercials along its stretch. The Western Gopuram is The first view to pilgrims from AH43 to the Middle Street.

RAMAN THEERTHAM (800 M)

ISSUES

There is absence of pavement along either sides of the road. Steps from buildings encroach the road bringing inconvenience. Open drainage with sand clogging the drain is a regular display.

TO LAKSHMAN THEERTHAM (1.2 KM)
TO PAMBAN (10 KM)

MULTIPLEX THEATRE

Proposal to redevelop the existing Theatre which is no longer in function into a Multiplex Theatre; the reason which draws a major population of Rameswaram to the neighbouring Districts like Ramnad and Madurai. The proposal would be an invite for the localites.

CONSERVATION OF GREEN SPACES

Proposal to conserve the green areas. Being a land facing immense heat and atmost humidity, the apt solution for a better environment would be conservation of green which would be more effective than increasing the number of buildings which would only increase the local temperature there

Proposal to conserve the open space and add green to it using landscape feature to it would not only enhance the micro-climate but also present a pleasing environment to the Ramar Theertham devotees.

GREEN AMPITHEATRE

Proposal to construct an Amphitheatre on the barren land at Thiruvalluvar Nagar would serve as a cultural arena where people can gather for any community level meeting. This would also serve as a hub where students could gather for public meetings. At the same time serve to add green to the locale to influence micro-climate.

TEMPLE COMPLEX

Proposal to shift the commercial buildings along the Temple complex to the existing Government School Campus so as to create an entirely devotional arena. The demolished part be replaced by sculptures and artifacts so to add charm.

GATED COMMUNITY

Proposal to widen roads especially the local and collector roads. Incorporating necessary road signs and traffic signals

AGNI THEERTHAM

Proposal to develop the Agni Theertham zone into a pure karma giving area by enhancing it into a no-noise pilgrim site.

Proposal to add separate bathing area for both men and women by constructing caged provision helping them bathe during karma.

Proposal to establish a plant to which the dumped clothes at the Theertham are to be collected and regularly decomposed and regularly maintained by official

CRZ REGULATION

As per the notification, the coastal land up to 500m from the High Tide Line (HTL) and a stage of 100m along banks of creeks, estuaries, backwater and rivers subject to tidal fluctuations, is called the Coastal Regulation Zone (CRZ). Prohibition of development within 500m is ensured by the Coastal Regulation Zone regulations of India.

COMMERCIAL COMPLEX

Proposal to shift the commercial buildings along the CRZ to the existing Government School Campus and create a commercial complex. Thereby ensuring that no commercials exist in CRZ zone. Also ensuring a new location for the School.

Proposal to redevelop the port to accommodate about 70 boats in contradiction to the present

hold of 20 boats use the deck only during loading and unloading

④

CONCRETE FLOOR HOSPITAL

Proposal to construct a concrete floor which would help the fishers to dry the fish products in a better hygienic environment rather than the existing shore which shares the space with the local drainage water.

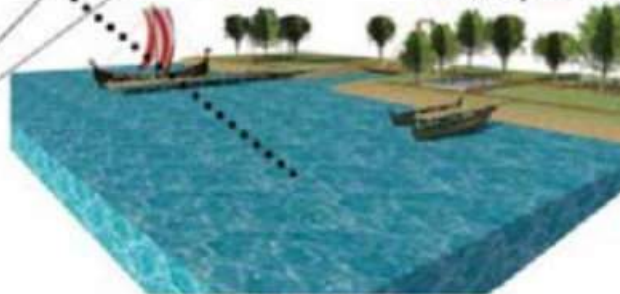

Proposal to redevelop the existing Primary Health Centre into a Multi-Speciality Hospital; the reason for which the locals flee to Ramnad for better facility. This marks the urge for a Multi-Speciality.

SPORTS COMPLEX

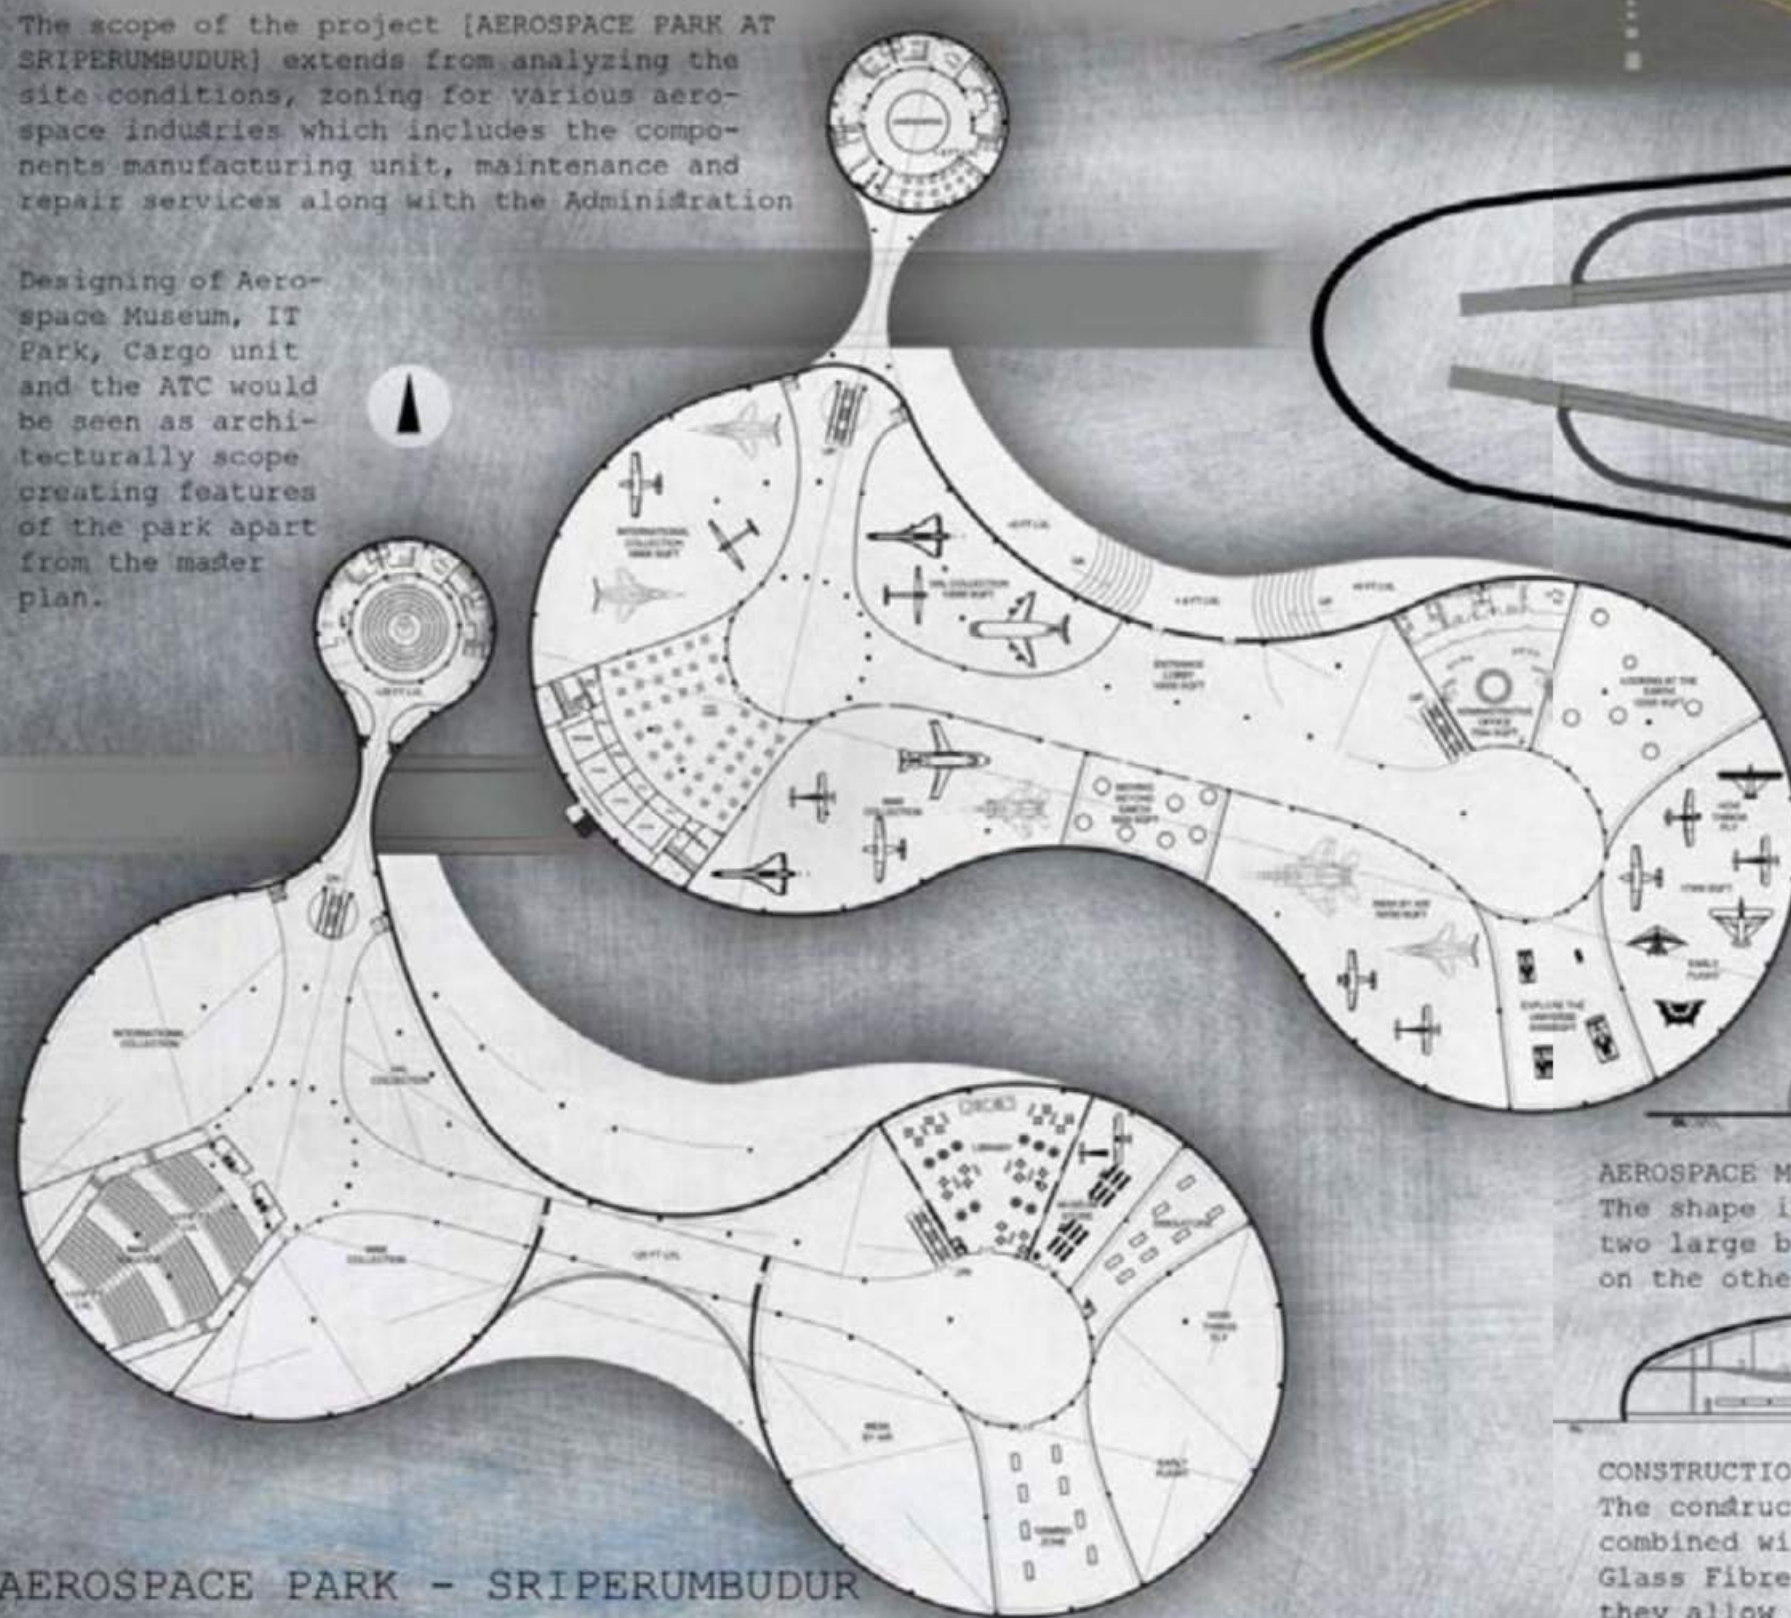

Proposal to include a Sports Complex in the barren land of Thiruvalluvar Nagar besides the Railway Station along with an athletic track and other basic sports amenities. This has caused the locals to flee to neighbouring Districts to better their Sports talents.

Proposal to construct an outer ring road for cycling along the shore of Agni Theertham. The ring road leads to an eco-friendly park. This leads to a leisure area which would enjoy the silhouette and add an image to the port area

Designing of Aerospace Museum, IT Park, Cargo unit and the ATC would be seen as architecturally scope creating features of the park apart from the master plan.

The runway length at 3km is used.
Non intersecting Runways which are divergent towards SOUTH - EAST and WEST of SOUTH - WEST are proposed to ensure the 95.0% wind coverage and operation during most of the time in all seasons

AEROSPACE MUSEUM

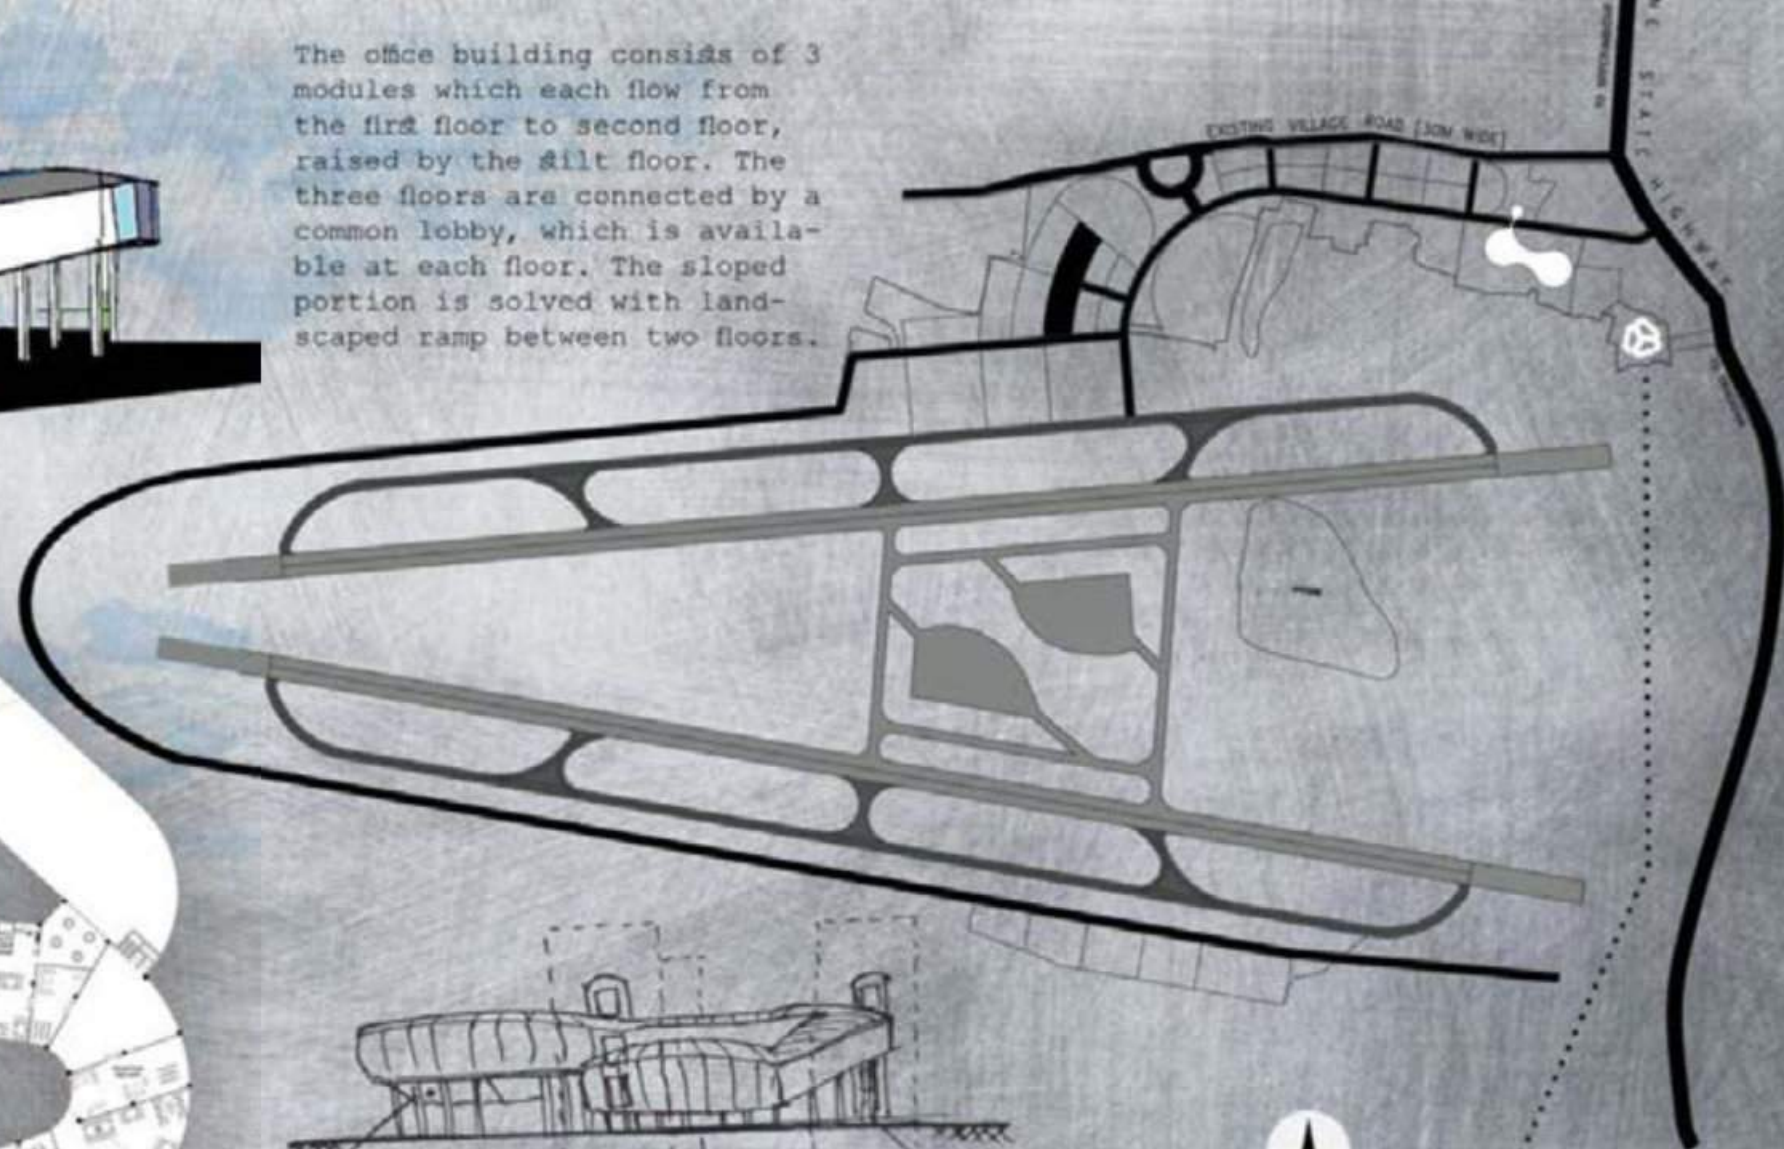

The shape is conceived as a an emerging life from a parenthood, by having two large bulges parenting an emerging component, which is seen to emerge on the other side of the road.

CONSTRUCTION

The construction part consists two collaborating system: a concrete structure combined with a space frame system. Glass Fibre Reinforced Concrete (GFRC) Glass Fibre Reinforced Polymer is chosen as ideal cladding materials, as they allow for powerful plasticity of the building's design while responding to very different functional demands related to a variety of situations.

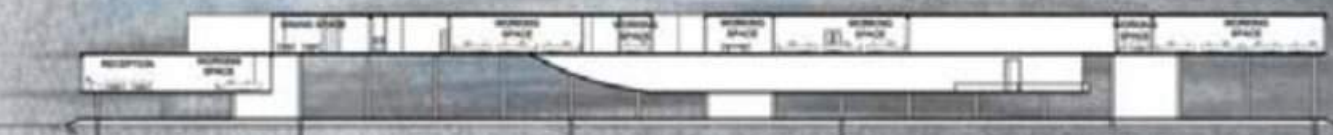

The office building consists of 3 modules which each flow from the first floor to second floor, raised by the tilt floor. The three floors are connected by a common lobby, which is available at each floor. The sloped portion is solved with landscaped ramp between two floors.

GROUND FLOOR PLAN

KSEA Karnataka Scientists and Engineers Association is a housing society that had its beginnings in the year 2014 with the sole purpose of providing superior housing to its members at affordable prices. The site located at a close distance from the Kempegowda Airport gave certain criterias within which apartments were not allowed within the site area. So the Gated Community was to be designed with villas and amenities not reaching more than G+2.

Our architects team was commissioned to creating a master plan for the gated community along with the required amenities. Plots of three dimensions were required from the associations end. The villa plots were classified under the names of various constellations.
